HACKATHON:

# GAME: VERTICHRON

#### **GAME DESCRIPTION**

The game is based on an astronaut who is stuck in vortex, he hallucinates his fears in the vortex trying to escape and then realises its just a loop.

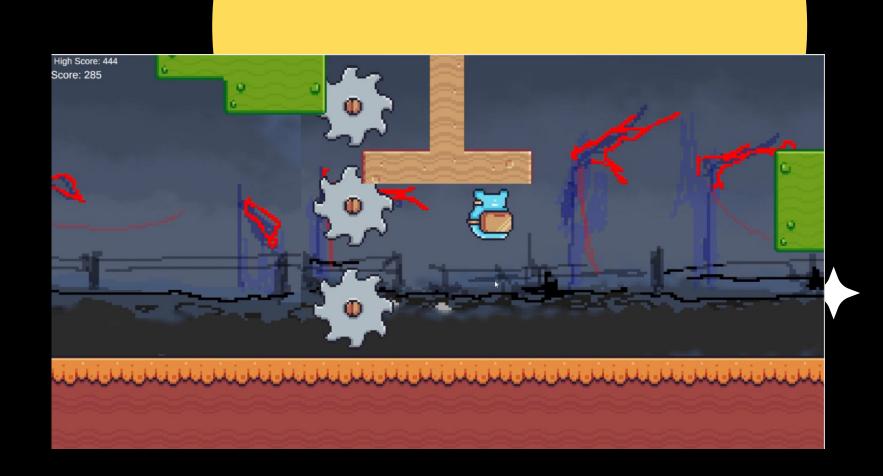

#### GAME MECHANICS

**DOUBLE TAP:** To swap sides upside and clear the obstacles.

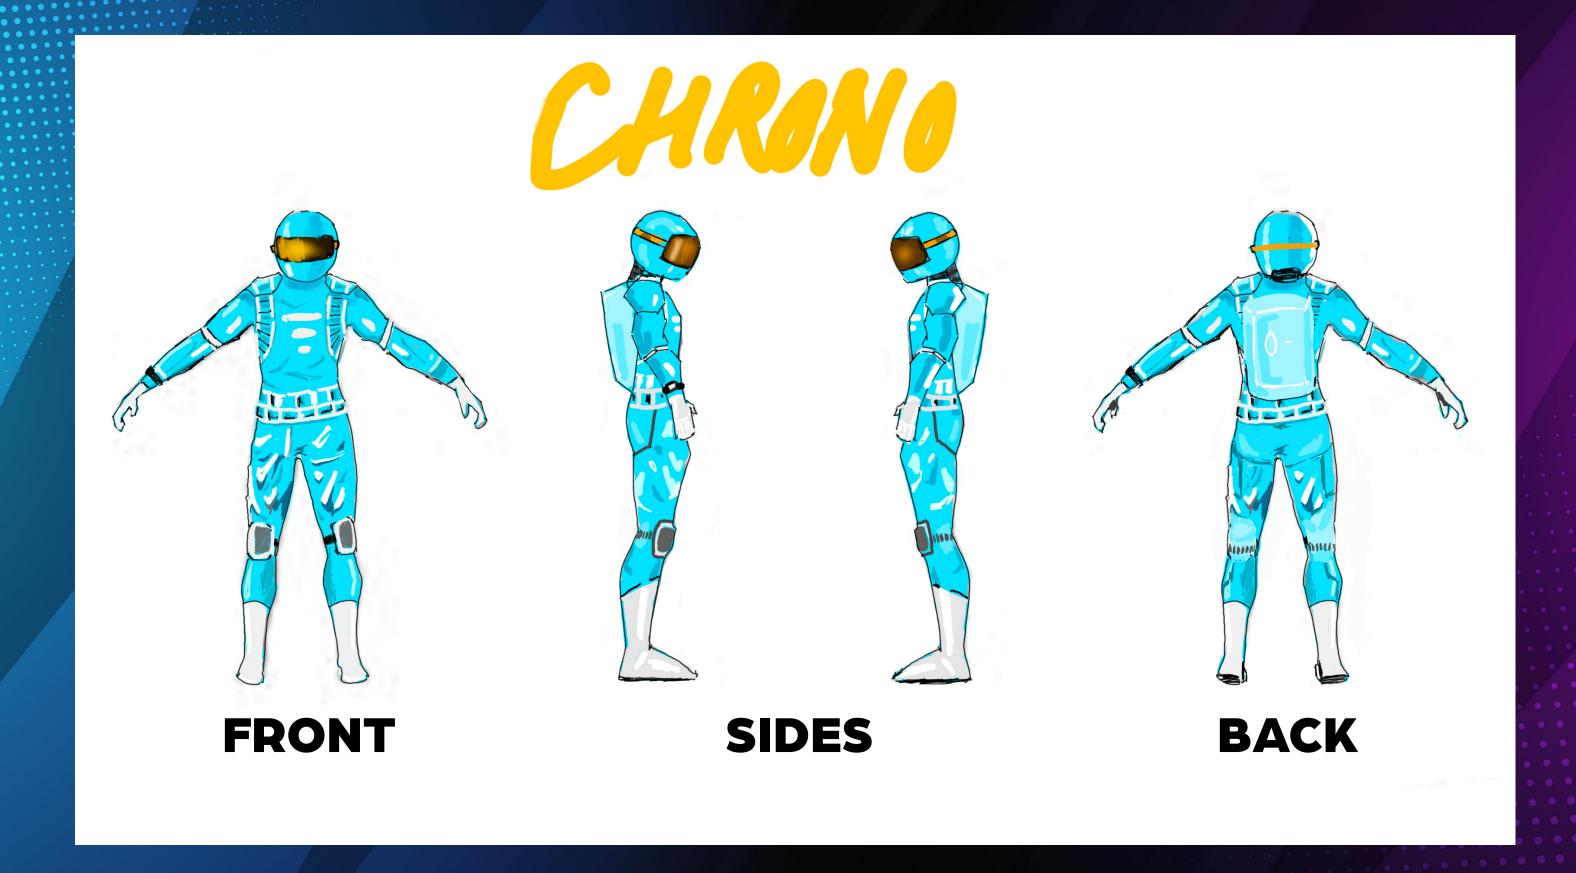

**SINGLE TAP:** To jump.

**HOLD+SWIPE:** To dash and run through risky maneuvers.

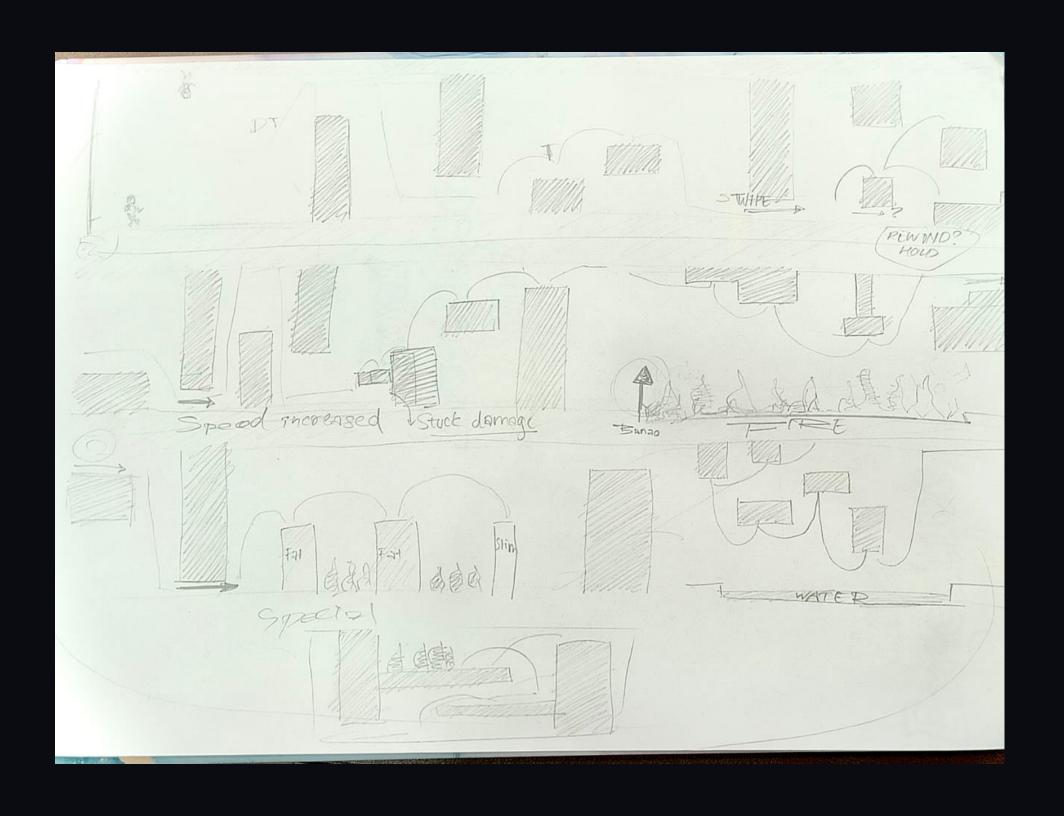

# CHARACTER DESIGN:

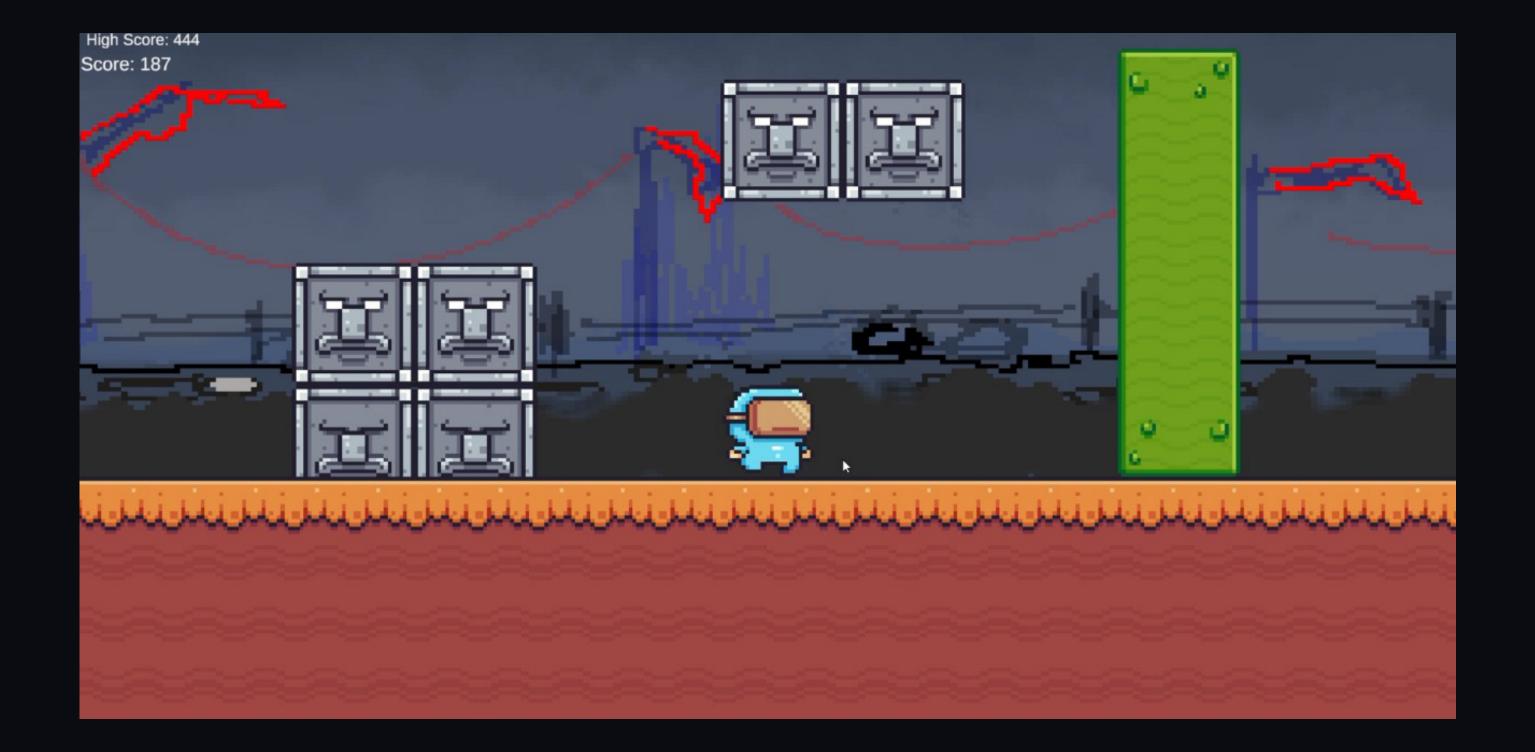

#### CHARACTER DESCRIPTION:

The character is an astronaut whose name is "Chrono". He is a space explorer. He fears saws and spikes also he is claustrophobic.. He hallucinates all of his fears while being stuck in the vortex.

#### **GAME MAP IDEATION:**

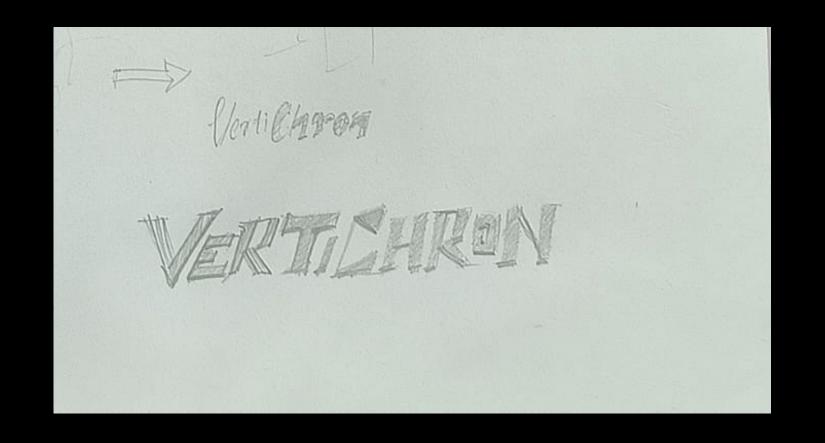

Chrono hallucinates different obstacles throughout the game. He is stuck on a loop where he has to survive.

#### THE FINAL IDEATION:

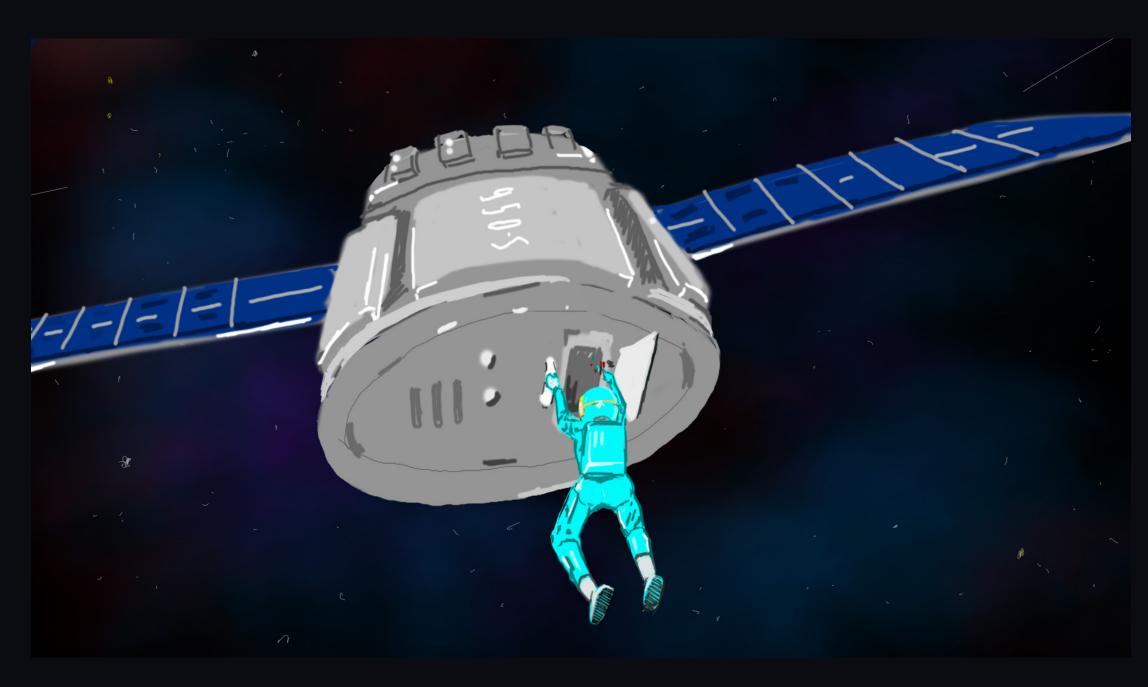

# THE ROUGH IDEATION:

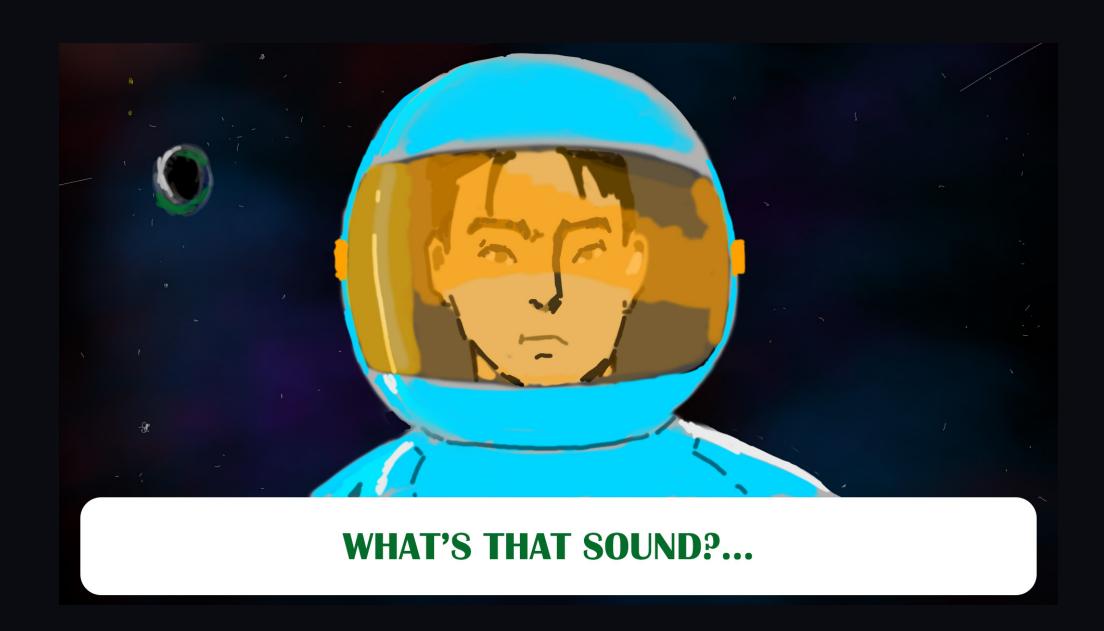

# SCENE 1:

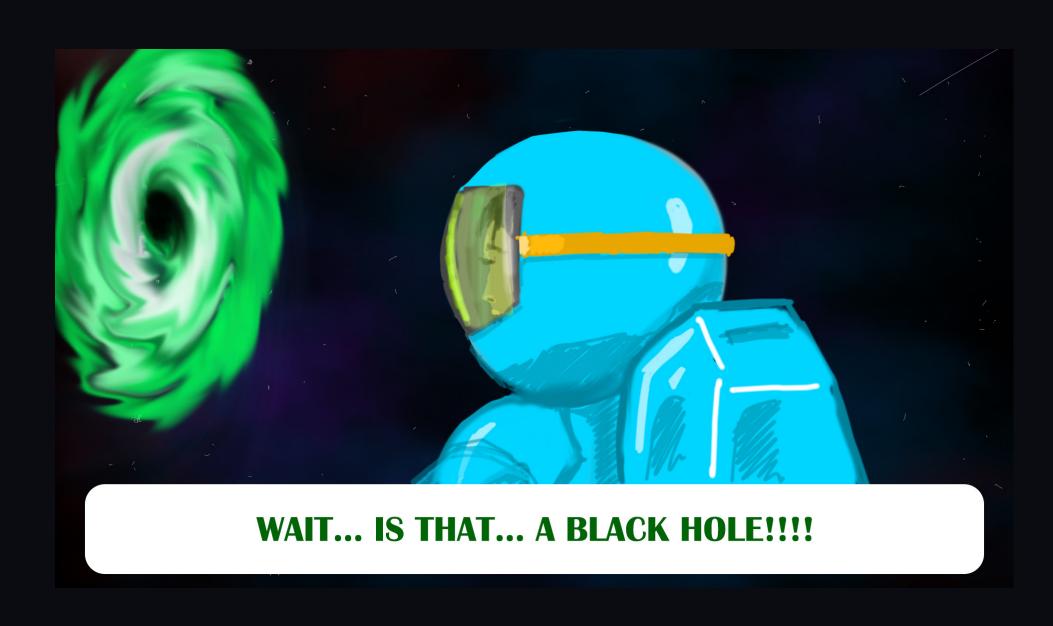

One day, Chrono analysed some problems with the satellite's energy and as he tries fixing it.

# SCENE 2:

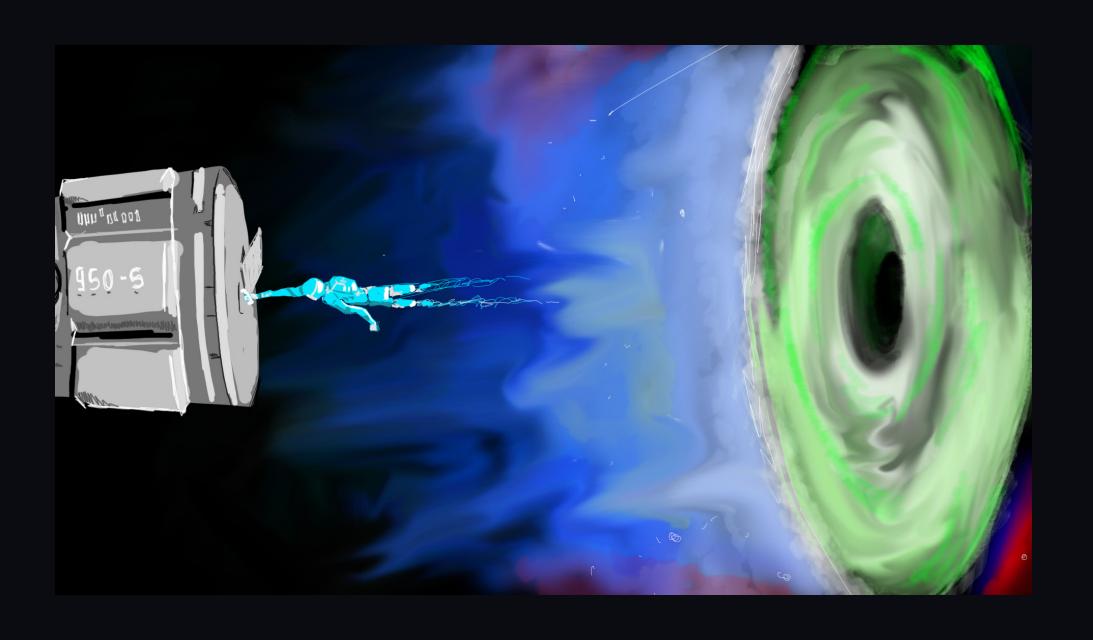

As he was fixing the satellite, a tiny hole appears behind him and he hears a loud noise

# SCENE 3:

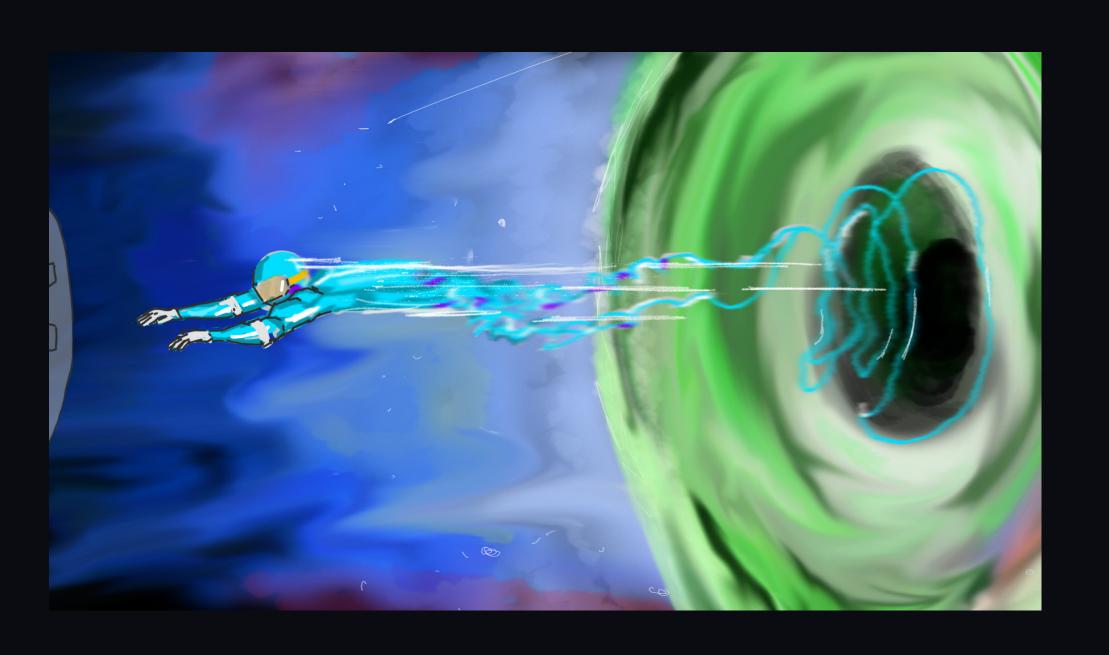

He turns back and sees a huge green vortex behind him

### SCENE 4:

He realises he's gonna be engulfed by the vortex.. he breaks into strands..trying to hold on the handle of the satellite.. even the satellite sinks with him

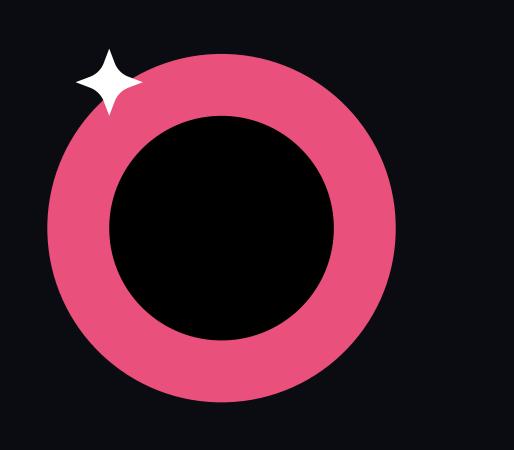

#### SCENE 5:

A close up view of him being engulfed by the vortex and his hand slips from the handle. You can see the helix physics activity of the strands at the mouth of the vortex
